Track 1 – 10 Week Boot Camp - $2,099 – Industry experience and/or currently working in the networking field recommended

The Cisco Certified Network Associate (CCNA) certification covers switch and router administration for small- and medium-sized networks. You will gain skills in managing Cisco devices on a private network, with multiple subnets, connected to the Internet.

Track one prepares the student for the CCNA exam. This track is a 10-week boot camp and covers 80 hours of instructions. Gaining the CCNA certification qualifies you for the following job roles: Cisco network administrator, Cisco entry-level help desk. The CCNA certification exam includes performance-based questions that require you to complete switch and router configuration or troubleshooting tasks. This course prepares you for the certification exam by giving you practice in a virtual environment using our online labs.

Here are many of the tasks you will practice:
- Configure basic device settings (hostname, passwords, banners)
- Configure CDP settings
- Enable and disable switch ports
- Configure and enable router interfaces
- Configure a wireless client
- Configure router serial interfaces
- Configure VLANs, trunking, and VTP
- Configure spanning tree
- Secure routing traffic using access lists
- Configure and troubleshoot routing protocols (RIP, OSPF, EIGRP)
- Configure Frame Relay (static, point-to-point, multipoint)
- Configure NAT

This track provides a comprehensive training methodology includes video, text, labs, and certification test prep software. Hybrid delivery of this course will consist of Introduction in class meeting on Saturday. Midterm and Final exams required.

Track 2 – $3,800 - No industry experience or prior knowledge required.

The Cisco Networking Academy is a global education program available in 160 countries that teaches students how to design, build, troubleshoot, and secure computer networks. This track provides online courses, interactive tools, and hands-on learning activities in the Cisco Lab. Students enrolled in the Cisco academy have access to a complete collection of the entire course lab exercises that provides hands-on practice and challenges. This official Cisco Academy Curriculum prepares the student for the CCNA exam and provides a comprehensive knowledge of the theory and concepts of Cisco Networking. 240 instructional hours.

- CISCO 1, Network Fundamentals - 7 weeks
- CISCO 2, Routing Protocols - 7 weeks
- CISCO 3, Switched Networks - 7 weeks
- CISCO 4, Wan Protocols - 7 weeks

Cisco Certified Network Associate (CCNA) certification validates the ability to install, configure, operate and troubleshoot medium-size router and switched networks including implementation and verification of connections to remote sites in a WAN. Hybrid delivery of this course will consist of 4-in-class meetings per course on Saturday, and a proctored final exam.
